

VECTAWAY® CROSS-OVER LADDER

Ref.: VSDLA02

Product sizes:

Models:

Model	Height (H)*	Floor length (L)*	Weight	Reference
2x2 steps	630 mm	1540 mm	105 kg	VSDL02
3x3 steps	850 mm	1650 mm	115 kg	VSDL03
4x4 steps	1070 mm	1760 mm	125 kg	VSDL04

Use:

VECTAWAY® crossover ladder is a piece of equipment used to get over obstacles such as parapets, casings, turrets and expansion joints, in complete safety. The plastic pads and clipped soles preserve the roof tightness. The handles of the plastic pads allow a good control and optimize handling.

Technical features:

- Material: aluminum.
- Steps: non-skid sheet.
- Ballasting with offset plastic pad (2 x 12,5 kg).
- Sizes which comply with standards in force.

Advantages:

- Economical.
- Delivered in kit pre-mounted.
- Assembly in less than ten minutes with two people.
- Available in four standard models.
- Other dimensions upon specific request.
